

SIIM25 #AskIndustry Topics

1. *Cloud PACS Voices: Lessons Learned From Your Peers* | **SOLD OUT**

The cloud has reached an inflection point. At last year's cloud #AskIndustry panel, it was clear the industry spoke collectively, touting that cloud had arrived and there was no turning back. Transformation to the cloud has resulted in significant relief for Imaging. It's no longer a future conversation, it's now.

Join us as we redirect the conversation to the voices of change themselves. Hear from imaging professionals AND their PACS vendor partners, to learn how the long-sought-after move to the cloud has brought PACS relief. Learn from your peers to prepare and take best advantage of cloud opportunities for your PACS.

Session Objectives:

- Learn firsthand from imaging professionals how their organizations planned their shift from historically on-premise PACS to the cloud.
- Identify key strategies how you can best optimize your future cloud PACS, avoid pitfalls and maximize opportunities.
- Listen to industry experts share keen insights about customers who have moved their PACS to the cloud, and the underlying technologies that make it all possible.

2. *Enterprise Imaging in the Cloud: Soaring to New Heights* | **1 SPOT LEFT**

The cloud continues to garner major investment from healthcare institutions poised to reduce and eliminate ongoing data center investments. While PACS is the largest system in Imaging, there are numerous other applications that can be moved to the cloud, including, but not limited to VNA, Workflow, Image Sharing/Exchange, Reporting, and AI. Every application will undoubtedly have their own journey, and once the data is in the cloud, Enterprise Imaging applications will make the move too.

The cloud transformation is underway, and it may already have arrived at your institution. Whether you're on your way, or still in the planning stages, learn from industry how customers have made the transition and benefited from the cloud.

Session Objectives:

- Hear lessons learned about transformational case studies from institutions that look just like yours.
- Gain clarification how to best leverage your data in the cloud.
- Zero in on the best strategies to prioritize, scope and sequence your application(s) move to the cloud.

3. *Beyond Transformation: Generative AI's Integration and Impact on Radiology in 2025* | 2 SPOTS LEFT

In 2025, Generative AI moved beyond early exploration to practical and transformative applications in radiology. This session will explore how the past year's breakthroughs in foundation models and multimodal capabilities have reshaped the field.

Industry leaders will present their latest experiences and use cases. Join us as we discuss cutting-edge advancement, benefits realized, lessons learned, challenges with generative AI development and deployment, including the regulatory landscape, and much more.

This session is essential for radiologists, healthcare administrators, and technology professionals who want to understand the current state of Generative AI in radiology and prepare for the next wave of innovations.

Session Objectives:

- Examine cutting-edge applications of Generative AI in radiology.
- Analyze lessons learned from scaling Generative AI systems in clinical environments.
- Explore advanced use cases in Generative AI and emerging trends.
